

Thursday, MAY 23rd · 2019
EDITH MACY CONFERENCE CENTER

This is the LHRIC's capstone teaching and learning event for the year! This event is designed for district stakeholders from across the region as a showcase for what works, what we should look forward to, and even what to avoid as we move to a more personalized learning environment across all teaching and learning. The LHRIC is frequently asked to help districts learn about what others are doing well, and what should we be paying attention to. This is that event!

This year's conference theme is: **"Get your Game On!"**

KEYNOTE SPEAKER: LIZ KOLB

From Research to Practice: Technology in Learning with the Triple E Framework

How can hundreds of studies on education, learning and technology inform our technology choices when using digital tools everyday in our classrooms? There are research-informed methods and choices that educators can make so that the technology they integrate can support engagement, enhancement and extension of learning goals.

Liz Kolb is a clinical associate professor at The University of Michigan in Ann Arbor, MI. She authored *Toys to Tools: Connecting Student Cell Phones to Education* (published by ISTE in 2008), *Cell Phones in the Classroom: A Practical Guide for the K-12 Educator* (published by ISTE in 2011), *Help Your Child Learn With Their Cell Phone and Web 2.0* (published by ISTE in 2013), *Learning First, Technology Second* (published by ISTE in 2017).

Liz has published numerous articles and book chapters on new technologies and education in prominent publications such as *Education Leadership*, *School Administrator Magazine*, *Scholastic*, *Edutopia*, *ISTE's Edtechhub*, and *Learning and Leading with Technology*.

Liz has done consulting work and has been a featured and keynote speaker at conferences all over the United States and Canada. Liz is currently co-chairing an auxiliary committee for the U.S. Office of Education Technology on sustainable professional development in teacher education. She is a MACUL board member and a member of the COSN advisory board for mobile learning and emerging technologies.

She is passionate about engaging students in education and leveraging learning opportunity through digital technologies. Liz is also the creator and coordinator of the Triple E Framework, which is an open-source framework for K-12 teachers and administrators to use to assess the effectiveness of technology in lesson plans. She is also the creator of the 4T Virtual Conference, which is a free global conference for practitioners that occurs every May. Liz is a former social studies and computer technology teacher. In addition she spent 4 years as a technology coordinator and integration specialist in Ohio.
