Dear Parents and Guardians:

If you plan to travel during the upcoming Spring Break, you must continue to follow the [New York State Travel Advisory](#) until further notice. Although Governor Cuomo made an announcement that quarantine for domestic travel would no longer be required starting April 1st, the Governor has not issued an Executive Order. In the event there is a change to the quarantine requirements, the District will notify everyone as soon as possible. Travelers must continue to quarantine upon arrival in New York according to the current guidance:

All travelers entering New York from a state that is not a contiguous state who have been outside of New York for more than 24 hours must:

- Complete the [Traveler Health Form](#).
- Obtain a COVID-19 test within three days of departure, prior to arrival in New York.
- Upon arrival in New York, quarantine for three days.
- Obtain another COVID-19 test on day 4 of their quarantine,
- If both tests come back negative, the traveler may exit quarantine early upon receipt of the second negative diagnostic test.
- Travelers who do not obtain a test prior to arrival in New York and/or on the 4th day in New York, must quarantine for 10 days.

Travelers who were out-of-state for less than 24 hours:

- Do not need a test prior to their departure from the other state, and do not need to quarantine upon arrival in New York State.
- Must complete the [Traveler Health Form](#) upon entry into New York State.
- Obtain a COVID-19 diagnostic test 4 days after their arrival in New York.

Mandatory Quarantine for International Travelers

- Prior to arrival in the United States, travelers must test negative no more than 3 days prior to day of travel to the airline before boarding the flight.
- After arrival in the U.S., travelers must either quarantine for 7 days with a test 3-5 days after travel, or quarantine for the full 10 days without a test. This requirement applies to all international travelers whether they were tested before boarding, are recovered from a previous COVID infection, or are fully vaccinated.

Further, domestic travelers to New York may be exempt from quarantine if they satisfy the following criteria.

- Consistent with [recent CDC guidance](#), asymptomatic individuals who have been vaccinated against COVID-19 do not need to quarantine during the first 3 months after full vaccination if such travelers:
 - Are fully vaccinated (i.e., ≥ 2 weeks following receipt of the second dose in a 2-dose series, or ≥ 2 weeks following receipt of one dose of a single-dose vaccine); AND
 - Are within 3 months following receipt of the last dose in the series; AND
 - Have remained asymptomatic since last COVID-19 exposure.
- Consistent with CDC guidance from February 13, 2021, asymptomatic individuals who have previously been diagnosed with laboratory-confirmed COVID-19 and have since recovered, are not required to retest and quarantine within 3 months after the date of symptom onset from the initial COVID-19 infection or date of first positive diagnostic test if asymptomatic during illness.
- Travelers from states that are contiguous with New York (Pennsylvania, New Jersey, Connecticut, Massachusetts, Vermont) are exempt from the travel advisory.
