

After-School Science Program

Mad Science activities are so much fun, that children forget they are learning! These recreational science programs are designed to help kids enjoy science. Mad Science after school enrichment topics are on a three-year rotation, so repeat students should not see a specific science class again for a long time.

Winter 2019: Adventures in Science

During this science sampler, children will uncover the vital role that science plays in detective work, examine the physics behind popular toys and get a buzz out of the amazing world of insects. Your Mad Scientists will explore earth science, weather phenomena, and experiment with some kitchen chemistry. Children will build their own Mad Science Machine, and create their very own short animated cartoon.
