

3rd Grade News

April 2017

Math

You child has been learning all about division this month. We practiced strategies including drawing arrays, drawing equal groups, using repeated subtraction and the bar model to solve division problems. We also worked on memorizing division facts up to 100 and have been practicing division word problems. Students know that a division problem may be referring to the number of equal groups or the number of items in each group.

Reading/Writing

A big congratulations to our third graders for all their hard work preparing for and taking the ELA State Test. Students learned how to tackle reading passages, multiple-choice questions and answer short/extended writing prompts. They also used their understanding of the differences between fiction and nonfiction passages to find main ideas, summarize, and more during the test.

Notes from the teacher:

May 2, 3, 4: NYS Math test-Let's keep up the momentum and review both at school and at home!

Please make sure your child reads every night for 30 minutes in a just right book.
