

Since the camp begun in 2013, 67 students from local schools have participated and over \$14,000 in scholarships have been awarded to students on the winning team. The goal of the camp is to introduce today's high school students to the manufacturing process that includes a variety of activities including tours of local manufacturers, hands on learning and lectures from industry professionals. Each of the teams are led by industry professionals that guide the students through their team projects.

Highlights

- Camp is free to participants thanks to sponsoring companies
- Students take 3 field trips to area manufacturers
- ITAC Engineers & Constructors and Community College Workforce Alliance are participating camp partners
- Register online at www.dreamitdoitvirginia.com
