TECHNOLOGY LEADERSHIP INSTITUTE

This year's TLI events have been organized to provide you with more of an emphasis on the Celebration of Teaching and Learning. Our awards ceremony at the end of the year will bring together the best ideas we can find from our local region that exemplify this emphasis on what is happening by way of excellence in teaching and learning through technology.

Our efforts this year were also formed by our ability to expand upon our connections with vendors to allow you to be able to see and hear about new technologies and how they too have influenced and changed teaching and learning. Several events will bring in many new as well as established vendors to help you sort out your needs and to plan for new implementations that you feel will help to bring your vision to reality within your school district.

Through your participation in these various sessions will give you the best opportunity to maximize your membership and get the most value for the expense. We continually try to identify keynote speakers from around the country that are thought-provoking and inspiring. The advantage is that you and other participants from your district will be able to attend sessions that otherwise would be outside of your reach due to the expenses of attending a national conference in a location that is too far to be feasible to attend.

It is our hope that as you review the content of these sessions within the TLI event schedule, you will find something that will be beneficial for you and your school district. Your membership entitles you to bring along 8 staff members to participate in any or all of these sessions. Hopefully you will find so much good content when you attend, that you will not want to miss the next session. We look forward to seeing you as a participant at all of the events listed here for this year's TLI program.

Dennis R. Lauro, Jr., Ed. D.
Executive Director

NYSCATE HUDSON VALLEY CONFERENCE

Roy C. Ketcham HS—99 Meyers Corners Rd | Wappingers Falls, NY | March 3, 2018

The Hudson Valley NYSCATE Conference, organized by the New York State Association for Computers and Technologies in Education will take place at the Roy C Ketcham High School in Wappingers Falls, NY . The conference will feature presentations by teachers from across NY. It's a great chance to meet and share ideas about teaching and learning with technology. Presentation proposals will be accepted 9/1/17-10/15/17.

TLI TECH SUMMIT

Edith Macy Conference Center | Briarcliff Manor, NY | Oct 27, 2017 (7:30 AM - 3:00PM)

The Fall Tech Summit is designed with a focus on our clients and our vendors and is purposefully aligned to align budget development lifecycle. We have invited more than 40 instructional/technology vendors to share their products, information, and talk with you to align with their products and your district objectives. This year we have more than doubled the vendor floor at the Edith Macy Conference Center. Back again this year, vendors will have opportunities to present to you using the ignite format to maximize time. And what better way to look at the use of the school and district technology investments than through the research of our keynote speaker, Dr. Rueben Puentedura, founder of the SAMR Model.

DR. RUBEN R. PUENTEDERA

Dr. Ruben Puentedura is the Founder and President of Hippasus, a consulting firm based in Western Massachusetts, focusing on transformative applications of information technologies to education. He has implemented these approaches for over twenty-five years at a range of K-20 educational institutions, as well as health and arts organizations. He is the creator of the SAMR model for selecting, using, and evaluating

technology in education, which currently guides the work of the Maine Learning Technology Initiative, as well as projects in Vermont and Sweden. His current work explores new directions in mobile computing, digital storytelling, learning analytics, and educational gaming, focusing on applications in areas where they have not been traditionally employed. He can be reached at rubenrp@hippasus.com.

Redefinition <i>Tech allows for the creation of new tasks, previously inconceivable</i>	Create
Modification <i>Tech allows for significant task redesign</i>	Evaluate
Augmentation <i>Tech acts as a direct tool substitute, with functional improvement</i>	Analyze
Substitution <i>Tech acts as a direct tool substitute, with no functional change</i>	Apply
	Understand
	Remember

Leave No Child Offline, Leave No Teacher Behind: How One of the Poorest School Districts in America Helped to Lead the Transformation of Education in America!

Digital equity and access in the 21st century are crucial to students being able to compete on a global level. There are few places in society where technology is not utilized or playing an important role. As a result, it's more critical than ever that students graduate with the 21st-century literacy and technology skills they need to navigate and succeed in our increasingly interconnected, digital world. Dr. Darryl Adams, Superintendent from Coachella, CA, will share the story of how one of the poorest school districts in America helped to lead the transformation of education in America and how your school and district can be a part of this transformation!

TLI WINTER EVENT

Edith Macy Conference Center | Briarcliff Manor, NY | Jan 19, 2018 (8:30 AM - 12:30PM)

TLI WINTER EVENT-A Focus on Data!

Big-Small-Medium Data. Smart Data. Fast and Slow Data. Dirty Data. Dark Data. Predictive Analytics. Actionable Analytic. Data Science. Data Driven Decisions. Regardless of the words we use, there is no doubt that we have a plethora of data at our fingertips to help us determine the impact of just about any one thing on another, the causal relationships. What is lacking is time and oftentimes a new lens for looking at the data we interact with every day.

BEN WELLINGTON

Ben holds a Ph.D. in Computer Science (Natural Language Processing) from New York University. Ben is the creator of [I Quant NY](http://IQuantNY.com), a data science and policy blog that focuses on insights drawn from New York City's public data, and advocates for the expansion and improvement of that data. His data analysis has influenced local government policy including changes in NYC street infrastructure, the way New Yorkers pay for cabs and the design of NYC subway vending machines, he has been a contributor to The New Yorker, and his talk on urban data was featured on TED. Follow Ben on Twitter at @IQuantNY.

DR. JAN BRYANT

Dr. Jan Bryan has been intrigued by not only how, but why, we learn. Jan's work has taken her from a home-based early literacy program to years in the public school classroom, from one who delivered curriculum to one who wrote traditional and online curriculum for the state of Texas and from one who found assessment data interesting to one who seeks to find the child among those data. Dr. Bryan is the National Education Officer for Renaissance Learning. You can reach Jan at jan.bryan@renaissance.com.

New this year! Expanded day - afternoon session! Instructional Technology Plan Update and Action Planning 101 for Leadership Teams.

TLI CELEBRATION OF TEACHING & LEARNING

Edith Macy Conference Center | Briarcliff Manor, NY | April 6, 2018 (8:30 AM - 1:30PM)

This event is a celebration of excellence in the Region. This prestigious award is bestowed upon districts and individuals nominated by their colleagues and peers as demonstrating innovation, best practices, and having implemented systemic change in teaching and learning. Join us for this celebration and find out what the strategies are behind these success stories. New this year are the student poster sessions where students will demonstrate how the work of these educators has impacted their learning experience.

MANLEY FEINBERG II

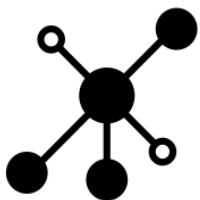

Having delivered over 5000 hours of professional speaking, Manley is recognized as an award winning speaker and Information Technology leader, a world class speaking coach and top professional business trainer in a wide range of business and technical topics. He leverages over 20 years of IT, business, and professional speaking experience; helping technical professionals at all levels in their career to take their presentation and communication skills to

the next level, enabling them to influence their customers, teams and colleagues, and build key business alliances.

Manley Feinberg II is the founder of VerticalLessons.com, a best-selling author, and an award-winning international keynote speaker. His insight and energy will inspire you to reach your next summit. Manley's eleven years of leadership influence contributed to a workplace culture that landed Build-A-Bear Workshop on the FORTUNE 100 Best Companies to Work For list four years in a row. Manley served two terms as the president of the St. Louis chapter of the National Speakers Association, and he is currently a member of the HDI Strategic Advisory Board.

THE TELL AWARDS

This event is a celebration of teaching and learning across the region. This prestigious award is bestowed upon teachers and leaders who have demonstrated a transformation in their classrooms and schools through innovation. Join us in as we learn about the strategies behind these inspiring success stories.

TLI TECH EXPO

Edith Macy Conference Center | Briarcliff Manor, NY | May 11, 2018 (7:30 AM - 3:00PM)

This is the LHRIC's capstone teaching and learning event for the year! This event is designed for district stakeholders from across the region as a showcase for what works, what we should look forward to, and even what to avoid as we move to a more personalized learning environment across all teaching and learning. The LHRIC is frequently asked to help districts learn about what others are doing well, and what should we be paying attention to. This is that event!

HEATHER DOWD—CHOOSE YOUR OWN ADVENTURE

Remember the "Choose Your Own Adventure" book series we loved as kids? Don't you think life is a little bit like those books? Think of a crossroad in your life where the choice you made led you to a new adventure. Chances are, you can name more than a few of those defining moments. What about our students? While we can't predict the choices our students are going to have in the future, we can prepare them to make choices that will lead to a rich and thick adventure story. What are the skills

and traits that helped you make the best decisions and how do we help build them in our students?

Heather Dowd is a teacher, education technology coach, science enthusiast, traveler, photographer, and most of all, a learner. She has worked as a physics teacher, instructional designer, and education technology coach in Japan, USA, Mexico, and Singapore. Teaching English with the JET program in Kumamoto, Japan inspired her to become a teacher and the adventure hasn't stopped. Heather is a Google for Education Certified Innovator/Trainer, Apple Distinguished Educator, and a Common Sense Digital Citizenship Certified Educator, and is co-author of the book, "Classroom Management in the Digital Age".

EPIC FAIL OR FIVE MINUTES OF FAME - NEW THIS YEAR!

YOU choose the story YOU want to tell. In this closing session, presenters share an experience about something that really catapulted their work forward or was a "teachable moment" through its failure. These presentations will be done in a 5 minute Ignite format. Application will be available with the Expo RFP announcements approximately two months prior to the conference.
