

March 3, 2023

**Green Team**

Agenda and Notes

Attendees: Brooke F., Camryn H., Mrs. Furlong (Advisor)

Worked on educational posters about Composting

Questions to follow up on: What can we do to speed up the composting process because we may have a lot of it! Composting worms—can they go into the composter? Not everyone has a study hall at the end of the day to be able to dump the bucket into the composter. Who will take on that task? We will need to teach the kids about what goes into the composter and what does not. Maybe get this up and running on April and make it part of our Big Buddy event. Maybe we start off composting in the fall and spring months to avoid the cold and frozen compost.

Posters will be worked on during Study Hall.

Next meeting: TBD
