Greetings Neighbors,

During the current economic struggles any assistance paying bills is certainly welcome. The National Weatherization Assistance Program (WAP) is available here in Warren County. The program focus is making homes more energy efficient therefore lowering energy bills. This is a free program for those who are income qualified. The program follows the HEAP income guidelines. If you receive HEAP or SNAP benefits you are automatically qualified. If you are not eligible you may know someone who is.

An energy auditor is sent to your home to investigate issues within the program guidelines. He/She develops a work scope tailored to the energy efficiency needs of your home. Once we agree upon the work scope your home is moved to our production schedule. The order of service is set up as first come, first served.

Interested parties should contact the Weatherization Assistance Program at 518-793-0636, jmillerwx@aol.com or in person at Community Action, 190 Maple St, Glens Falls NY 12801
