## **Green Team**

### Agenda and Notes

Attendees: Brooke F., Camryn H., Pailin H. Mrs. Furlong (Advisor)

Educational posters about Composting are complete!

In-progress service projects:

1. Still would like to get the composting up and running for last few weeks of school (sort of a "trial run" for next year). Two colorful, fact-filled composting posters have been completed.
2. The team has completed a flyer to be hung in town about how to be a conscientious watcher of loons. Next step is to get the facts and information into flyer format.
3. Students would like to purchase cigarette butt receptacles to be placed at two popular spots in town (Jennings Pond/Boat ramp)

Mrs. Furlong talked with Virginia from Lake Eaton and the returnable cans are still ours to return and collect the money (to be used for the cigarette butt receptacles). Paperwork will need to be done. Virginia is getting the information and will call Mrs. Furlong once she knows the process.

Next meeting: TBD
