Notes:

1. Not many students participated today due to having state tests the following day where they had to leave their chromebooks in school to charge.
2. Nathan and Angel took this time to see what issues may arise in their society if someone were to develop a duplication device where they could cheat to get resources.
3. Students have begun to put laws in place where every session played will pay a tax of one diamond to the Mayor of the village.
4. The mayor will build and maintain a storefront in the village where citizens can purchase or trade goods.
5. Mr. O'Shell has begun to build a structure over water after collecting resources. He was able to collect a diamond in order to pay his taxes
6. Nathan is building a temple on the island he made.
7. Will propose the idea to the group about having town meetings at the last 5 minutes of the club to go over what we accomplished and what will need to be accomplished still.
