

WARNING: THESE LAB RULES WILL ALWAYS BE FOLLOWED. VIOLATORS WILL BE ASKED TO LEAVE THE PREMISES AND NOT ALLOWED TO PARTICIPATE IN AWESOME LAB DEMOS. WORD TO THE WISE: **DO NOT BREAK THE RULES.**

Safety First. Seriously.

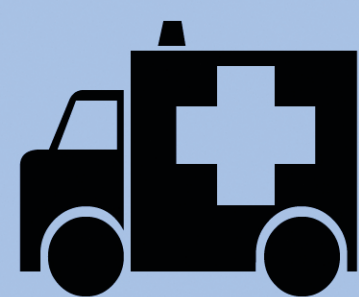

1. DO NOT TOUCH ANY EQUIPMENT OR SUPPLIES until explicit instruction has been given for you to do so. Love having your limbs? Me too! Keep them in tact by following this rule. It just might save your finger.

2. REPORT ACCIDENTS OR SPILLS IMMEDIATELY. Accidents happen. It's OKAY, but it's not okay to hide them. Properly cleaning up accidents and spills is the best way to ensure that no one gets hurt in our lab.

3. FOLLOW ALL LAB INSTRUCTIONS. Lab Instructions will be given for each different experiment or lab activity that we have throughout the year. Your job is to listen carefully and follow each one.

4. HORSEPLAY WILL NOT BE TOLERATED. Save the running, jumping, jogging, skipping and hopping for recess. If something gets broken, disaster might strike. Let's all behave like the REAL scientists we are.

5. NO FOOD OR DRINKS DURING LABS. Food + Chemicals = Lots of Sick Scientists. They don't mix. Please keep food and drinks away while we are conducting experiments or participating in lab activities.

6. IF YOU DON'T KNOW, ASK! Ask questions \Rightarrow ALWAYS. If you aren't sure about how something works, ASK. If you don't know and you don't ask, how can you learn? REAL scientists constantly ask questions, so never, ever be afraid to ask anything.
