

GRADPOINT™

Take personalized learning to the next level

› Intuitive › Scalable › Customizable › Proven

Limitless online and blended learning

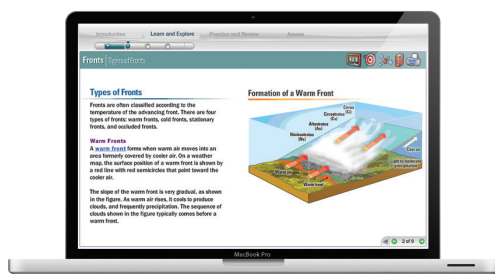

GradPoint™ is a student-centered learning platform that engages students and empowers them to take ownership of their learning with student choice and learning incentives. Teachers act as coaches to differentiate, intervene, and motivate students in their personalized learning pathway of rigorous, standards-based instruction.

A powerful LMS with all the content

Our robust course catalog is now enhanced by access to open education resources through a digital library, dynamic customization features, and student choice and ownership opportunities. All of this is supported by a learning management system with superior customization so you can create your own content libraries.

Ongoing progress monitoring

GradPoint's powerful assessment platform measures, tracks, and reports on student growth, student choice, and when to provide interventions. With these insights, you can take immediate, real-time action to intervene when students are struggling. And our new communications tools are designed to strengthen online collaboration and interaction between teachers and students.
