## Perfect Squares Chart

## Standard:

MGSE8.EE. 2 Use square root and cube root symbols to represent solutions to equations. Recognize that $x^{2}=p$ (where $p$ is a positive rational number and $l \mathrm{x} l \leq 25$ ) has 2 solutions and $x^{3}=p$ (where $p$ is a negative or positive rational number and $\mid \mathrm{x} l \leq$ 10 ) has one solution. Evaluate square roots of perfect squares $\leq 625$ and cube roots of perfect cubes $\geq-1000$ and $\leq 1000$.

Fill in the blanks.
