

Accessing Office 365 (E-Mail, Teams, etc.)

Office 365 provides students access to their e-mail, OneDrive and many Microsoft applications used in school (Teams, Word, Excel, Power Point, OneNote) from any device and will be an integral part of your child's distance learning during upcoming weeks.

In order to make sure you access Office 365 securely and avoid phishing scams, **always use the link located on the district's website** (image below) or a **designated mobile device app** (Android, iOS). You can favorite the login link in your web browser for convenience.

It is important to keep your contact information up-to-date to ensure that you continue receiving important notifications from the district. You can now update your contact phone and e-mail directly from [Home Access Center \(HAC\)](#).

For help accessing Home Access Center (HAC), contact Denise Douchkoff at ddouchko@carmelschools.org.

If you are experiencing technical issues, contact Technology Support at TechSupport@carmelschools.org.
