## Transportation

	Requirements	Recommendations	Considerations
Tier I- 100% on-site		Hand sanitizer available on the bus	
	Busses sanitized between routes with EPA approved products and protocols		
	School leaders will communicate the importance of self-assessment of health conditions daily	Parents will do temperature checks daily at home before student leaves for school	
		Social distancing during transportation as much as possible. Masks will be required to the greatest extent possible and in accordance with current public health orders if social distancing is not feasibly attainable. Seating on the bus by sibling group or classroom groupings would be appropriate.	Schools to provide masks
		Masks will be available on busses	
Tier II-Hybrid model		Hand sanitizer available on the bus	
	Busses sanitized between routes with EPA approved products and protocols		
	School leaders will communicate the importance of self-assessment of health conditions daily	Parents will do temperature checks daily at home before student leaves for school	
		Encourage parents to transport students to school	
		Social distancing during transportation as much as possible. Masks will be required to the greatest extent possible and in accordance with current public health orders if social distancing is not feasibly attainable. Seating on the bus by sibling group or classroom groupings would be appropriate.	Schools to provide masks
		Masks will be available on busses	
Tier III -100% remote	Schools closed	Busses sanitized at least daily	
		Busses used for delivering meals and/or academic coursework

Student Arrival to Building and through the day			
	<b>Requirements</b>	<b>Recommendations</b>	<b>Considerations</b>
Tier I - 100% on-site	Develop a plan for student arrival to building	Nurses Offices are separated into areas for healthy and ill students.	Separation recommendations could range from partitions, separate rooms, mobile units, etc.
	Symptomatic students will wear a mask even if separation from healthy students is feasible		
	Develop a plan for entrance to building whether limiting number of entrances open or requiring specific groups to use specific entrances	Handwashing upon entrance to building if feasible. Hand sanitizer available at all building entrances	Communication prior to school year regarding illness requirements
		Masks will be available in classrooms for students who report symptoms while transitioning to school health services	
	Any student reporting an illness will be sent home	Any student with reported symptoms will follow CDC guidelines for return to school/work	PPE Option 1: School districts can obtain PPE, infection control supplies, etc directly through a whitelisted account from Amazon. Accounts can be made available for school districts to purchase PPE through Amazon and have supplies directly shipped as needed. This provides school districts the flexibility and the ability to obtain PPE and other supplies directly. It also provides them the ability to obtain these supplies as needed throughout the year.
		Develop a plan for consistent seating arrangements and/or plans to limit the number of close contacts per student	PPE Option 2: Communicate with Homeland Security regarding need for PPE and other supplies.
		PPE will be provided , as possible, to school nurses and school staff working with potentially ill students. Develop a plan for barrier devices between front office staff.	
	Staff will be instructed to remain home if any symptoms present	Develop a plan for potential barrier devices in the front office and the cafeteria	
Tier II	Develop a plan for student arrival to building	Nurses Offices are separated into areas for healthy and ill students.	Separation recommendations could range from partitions, separate rooms, mobile units, etc.
	Symptomatic students will wear a mask even if separation from healthy students is feasible		
	Develop a plan for entrance to building whether limiting number of entrances open or requiring specific groups to use specific entrances	Handwashing upon entrance to building if feasible. Hand sanitizer available at all building entrances

		Develop a plan for potential barrier devices in the front office and the cafeteria	
Tier III	Comply with any public health recommendations regarding cleaning of facilities		
	Staff in the building would be provided PPE as requested		
Transitions			
	<b>Requirements</b>	<b>Recommendations</b>	<b>Considerations</b>
Tier I - 100% on-site			School provides all school supplies to be kept at school
	Work with local health department to develop a plan for incremental transitions in hallways	P.E. classes will meet outside as possible	
	To the greatest extent possible, adhere to local health department requirements regarding hand washing, masks, water fountains, and restrooms	Any shared student use equipment will be cleaned after each use	
		Adhere to local health department recommendations regarding recess and outdoor activities	
	Develop a plan to make hand sanitizer available at multiple locations within the building		
		Masks will not be required during P.E. activities	
Tier II - Hybrid model			Consider ways to limit student movement

# Safety & Wellness Guidance

		Consider options for limiting numbers of students congregating for meals	
	Work with local health department to develop a plan for incremental transitions in hallways	P.E. classes will meet outside as possible	
	To the greatest extent possible, adhere to local health department requirements regarding hand washing, masks, water fountains, and restrooms	Any shared student use equipment will be cleaned after each use	
		Adhere to local health department recommendations regarding recess and outdoor activities	
	Develop a plan to make hand sanitizer available at multiple locations within the building		
		Masks will not be required during P.E. activities	
Tier III - 100% online	Staff and employees in buildings will adhere to current health department guidelines in regards to social distancing and PPE		

## Nutritional Services

	Requirements	Recommendations	Considerations
Tier I	To the greatest extent possible, adhere to local health department requirements regarding hand washing, masks, water fountains, and restrooms		
Tier II	To the greatest extent possible, adhere to local health department requirements regarding hand washing, masks, water fountains, and restrooms		

# Safety & Wellness Guidance

Tier III	To the greatest extent possible, adhere to local health department requirements regarding hand washing, masks, water fountains, and restrooms		

## Dismissal and After School Programs

	Requirements	Recommendations	Considerations
Tier I	Health assessment daily for after school programs	Develop a plan for exit from building whether limiting number of entrances open or requiring specific groups to use specific entrances	
	Any student with reported symptoms will follow CDC guidelines for return to school/work		
	To the greatest extent possible, adhere to local health department requirements regarding health and safety protocols, i.e. - hand washing/hand sanitizer, cleansing equipment, social distancing, etc.		
Tier II	Health assessment daily for after school programs	Develop a plan for exit from building whether limiting number of entrances open or requiring specific groups to use specific entrances	
	Any student with reported symptoms will follow CDC guidelines for return to school/work		

# Safety & Wellness Guidance

	To the greatest extent possible, adhere to local health department requirements regarding health and safety protocols, i.e. - hand washing/hand sanitizer, cleansing equipment, social distancing, etc.		
Tier III			
Health and Wellness Sub Group: To provide guidance on the safety, health, and wellness of students and staff during the COVID-19 pandemic.
