

SUSTAINABILITY

The Board of Education recognizes the need to live sustainably and to meet the needs of the present without compromising the ability of future generations to meet their own needs. To that end, the District will endeavor to conduct its operations and make decisions based upon the following sustainability priorities:

- Protect students, staff and the community from environmental harm by striving to eliminate the use of toxic and harmful substances.
- Teach sustainability concepts throughout the K-12 District curriculum that include principles and practices of environmental, social, and fiscal responsibility.
- Adopt sustainability practices in District operations and procurement that balance environmental, social and fiscal responsibility, carefully consider lifecycle impact of District actions, and protect and enhance present and future quality of life.
