

Long Lake Central School Final Smart schools Investment Plan

The Long Lake Central School has finalized its Smart Schools Investment plan to be approved by the BOE. Our final plan includes use of the Smart Schools Grant monies for the following:

Update the connectivity within the school. Our Wi-Fi will be expanded and upgraded.

Currently, only 40% of the school has consistent Wi-Fi access.

Invest in classroom learning technology. Outdated laptops will be replaced at the 5-12 level with Chrome book HP laptops for each student and instructor for classroom use. Pre-K through grade 4 will have iPad tablets purchased for each student and instructor for classroom use.

Dr. Donald K. Carlisle, Superintendent

Long Lake Central School
