The process to complete the S.E.D. lead testing for the Katonah Lewisboro School District has been a long and time-consuming task. The O & M department at the school has been working along with us at Better Water Wells to make sure the testing procedure was following all the regulations required to have accurate results. This included labeling every sink, water fountain, bottle fill and ice machine in every school. Re mapping all the schools with the correct sink number, noting what sinks were mixed water and noting what sinks / fountains were to be tested or not and activating and flushing water fountains that have been out of service for over a year (due to covid) etc. Mike Lavoie and his crew were very involved with the process needed to make sure the lead testing was completed and up to regulation. We look forward to working with Mike and the O&M department in the future to continue providing clean, safe drinking water to the students and staff of the Katonah Lewisboro School District.

Thank you,

A handwritten signature in dark ink, appearing to read "Wendy Wakeman". The signature is fluid and cursive, with the first name "Wendy" being more prominent than the last name "Wakeman".
