

### **Technology Requirements and Supports**

In order for distance learning to take place, students will need access to the technology. Students may be required to access Internet resources posted by teachers to continue the educational process. Please review the list below to make sure your child is able to participate:

- Internet Access - make sure you are able to access the Internet, and work with your Internet service provider if you are having difficulties. Families in need of Internet access have options available through Covid 19 relief services. For more information visit <https://www.setda.org/priorities/equity-of-access/digital-equity/programs/> or contact the school your child attends.
- Devices - Middle School and High School students have access to district issued laptops, and should use those devices to access materials. In the event a student has a damaged or misplaced device, students should send an email to [techsupport@westbrookctschoools.org](mailto:techsupport@westbrookctschoools.org) with appropriate information. Elementary School parents and students will be provided with devices for use with distance learning. Distribution of devices will take place on March , 2020. Elementary school parents should expect an email from the school's principal for information about the distribution of devices.
