Appendices

Confidential Crime Assessment Cover Sheet

The Site Safety Committee will insert behind this page, except in any physically distributed versions of this document, an assessment of current status of school crime at the school campus or school-related functions.

The Site Safety Committee will review the following reports and statistics to assess possible crime rates at the school campus:

- a. Local Law Enforcement Crime Data
- b. Attendance Rates
- c. Suspension/Expulsion Data
- d. Property Damage Data

Appendix 1-1-2 Plan 1: Section 1: School Climate Strategies

Strategies to Maintain a High Level of School Safety

The Site Safety Committee will identify appropriate strategies to maintain a high level of school safety and insert them here.

The following tables are a tool to help you identify your goals and strategies.

Safe Physical Climate Goal:				
Objectives	Action Steps	Resources	Project Lead/s	Outcomes

Safe Social Climate Goal:				
Objectives	Action Steps	Resources	Project Lead/s	Outcomes

Confidential

Campus Specific Drop-Off and Pick-Up Procedures and/or Map Cover Sheet

Cover Sheet Only

The Site Safety Committee will insert Campus Specific drop-off and pick-up procedures and/or map behind this page, except in any publicly distributed versions of this document.

Plan 2: Section 1: Risk Assessment

Risk Assessment Template

Confidential Risk Assessment Template

P

1. Site Facility/Location

a. Location of School and Neighborhood

(Fill in information about where your school is located and describe the neighborhood your school is in. Example: CMP-AR's current enrollment is approximately 400 Tk-8th grade students located on the Little John Elementary School Site within the San Juan Unified School District in the community of Fair Oaks. The school site is situated in a neighborhood of family homes.)

b. Building Information

- i. [Each CMP Site will need to make this section specific to their campus. Example: CMP-AR is located on a 40-acre lot and includes four buildings (a multipurpose room, offices, and two wings of classrooms) a basketball court, a baseball field, and one staff parking lot. All classes take place in the two wings. Our school was built in [1969] by [San Juan unified school district] and is [brick and mortar, modular, etc].
- ii. Each CMP site will need to include a map of the building annotated with after hour's number, site spec maps, evacuation routes, shelter locations, fire alarm pull station, fire hydrants, fire extinguishers, first aid kits, hazardous material storage, and utility shutoffs and is reflected in Appendix 1-8. All staff members are required to know these locations as well as how to operate the utility shutoffs.

2. Physical Environment

Each Site will provide a brief description of their sites physical structure and campus appearance.

3. Site Population

a. General Population

CMP-[AR's] current enrollment is approximately [] Tk-8th. These students are supported by a committed staff consisting of:

- X Teachers
- X Teacher Assistants
- X Administrators
- X Administrative Assistants
- X Outside Services
- X Maintenance and Custodial Staff
- X Club M Staff
- X Community Service Volunteers (ex: ROP)
- X After School Enrichment Teachers

A master schedule of where classes, grade levels, and staff are located during the day is provided to each classroom and is available in the main office. The master schedule is included with this Risk Assessment for reference.

Appendix 2-1-1
Plan 2: Section 1: Risk Assessment
Risk Assessment Template

b. Special Needs Population

CMP is committed to the safe evacuation of students and staff with special needs. The special needs population includes students/staff with:

- Limited English Proficiency
- Blindness or Visual Disabilities
- Cognitive or Emotional Disabilities
- Deafness or Hearing Loss
- Mobility/Physical Disabilities (permanent and temporary)
- Medically Fragile Health (including asthma and severe allergies)

The school's current enrollment of students with special needs is approximately [X]; however, this number will fluctuate. Students and/or staff may require additional assistance if they are temporarily on crutches, wearing casts, etc.

4. Internal Security Procedures

Each site has established internal security procedures in the following areas: building intrusion, incident report procedures and school safety meetings. In addition, visitors must sign-in and display a visitor badge at all times while on site. Volunteers must be live-scanned.

Sites will provide more specific information here as well.

5. Risk Assessment: Hazard Analysis

In this section each site will conduct a risk assessment (using Appendices 2-1-2 thru 2-1-7) to identify and characterize the hazard, evaluate each hazard for severity and frequency, estimate the risk, determine the potential societal and economic effects and indirect effects, determine the acceptable level of risk, and identify risk reduction opportunities.

Each site will identify site based hazards, inside and out, hazards in their neighborhood and community, hazards imposed by humans as well as acts of God using the following table:

Risk Assessment - Hazard Analysis

Identify and characterize the hazard.	Evaluate each hazard for the severity and frequency.	Estimate the risk.	Determine the potential societal and economic effects and indirect effects.	Determine the acceptable level of risk.	Identify risk- reduction opportunities.
 What are the characteristics of the hazard? 	 What is the probability of the 	 Identify and quantify what will be affected 	Consider direct economic loss. (Costs of repair.)	Use steps 1 – 4 to establish	What cost effective actions will

2.8.16 Safety Committee jh/cjk

Risk Assessment Tool 1: Six Steps to Hazard Analysis

Six Steps to Hazard Analysis

- 1. Identify and characterize the hazard.
 - · What are the characteristics of the hazard? (High velocity winds, ground shaking,
 - What causes the event?
 - How does it trigger or relate to other hazards?
- Evaluate each hazard for the severity and frequency.
 - · What is the probability of the hazard/event happening annually, every 10 years or once a century?
 - What factors enhance or deter the probabilities?
 - What measurements or scales can be applied to determine severity?
 - Could other factors influence severity and frequency? (Weather conditions, etc.)
- 3. Estimate the risk.
 - Identify and quantify what will be affected by the event/hazard. This step imposes the human and built environment that could be affected, damaged, and/or disrupted.
 - · Include in the analysis the general building stock, inventories of lifelines and essentials. Population and developmental concentration need to also be included.
- Determine the potential societal and economic effects and indirect effects.
 - Consider direct economic loss. (Costs of repair, damaged structures, lifeline, etc.)
 - Consider indirect losses as well. (Replenishing supplies, or relocation, etc.)
- Determine the acceptable level of risk.
 - Use steps 1 4 to establish acceptable loss of risk.
 - What level of damage or impact will be tolerated?
 - Consider societal effects.
 - Assess public perception. (Political consequences of taking or not taking action to address the risks.)
- 6. Identify risk-reduction opportunities.
 - What cost effective actions will reduce or mitigate unacceptable risks?
 - Identify and implement outcome.

Plan 2: Section 1: Risk Assessment Risk Assessment Tool 2: Building Checklist

Identifying School-Based Hazards - Building Mitigation Checklist

This checklist can be used by administrators, teachers or staff to analyze hazards throughout the building that require mitigation. Be sure to check every room, custodian's closets, storage areas, and the gymnasium, and complete this form for each area surveyed. Use the information gathered during the hazard assessment to determine the scope of hazards throughout the school and to develop a plan and schedule to reduce the hazards.

Ar	ea:	
Su	rveyed By: Date	Surveyed:
	Hazard	Mitigation Measures
	Extended, unsupported roof spans	
	Large windows or panes of glass, especially: Not composed of safety glass Located near exits or evacuation routes	
	Suspended ceilings and light fixtures	
	Incompatible chemicals stored in close proximity or not stored to withstand falling and breaking	
	Hazardous materials located in areas that do not have warning signs	
	Paper or other combustibles (e.g., greasy rags) stored near heat source	
	Unsecured heavy or unstable items, including: Portable room dividers Appliances (e.g., water heaters, space heaters, microwave ovens) Filing cabinets, bookcases, and wall shelves Athletic equipment Vending machines TV monitors Wall-mounted objects Aquariums Table lamps	
	Unsecured fire extinguishers or fire extinguishers that require recharging	
	Electrical equipment	
	Heavy objects on high shelves	
	Hanging plants above or near seating areas	
	Other hazards (List):	

Identifying School-Based Hazards - School Grounds Mitigation Checklist

This checklist will help you identify hazards that exist on school property and mitigation measures that can be taken. Identifying these potential hazards will provide useful information for planning evacuation routes and assembly areas.

Begin your assessment of the school grounds with the school building itself. Then, assess other structures on the property. Finally, complete your assessment by surveying the grounds themselves.

Surveyed By:	_ Date Surveyed:
Hazard	Mitigation Measures
School Building: Long, unsupported roof spans Large window panes (especially over exit Heating and air conditioning units Overhangs Trees or shrubs that require pruning Other hazards (List):	rs)
Other Structures:	
☐ Unsecured portable structures ☐ Unsecured siding or roofing materials ☐ Incompatible chemical storage ☐ Inadequate ventilation ☐ Other fire hazards (List):	

Hazard	Mitigation Measures
Playground/Athletic Fields: Equipment in need of repair Rocks or other material that could cause injury Fences in need of repair Exposed nails, screws, or bolts Other hazards (List):	
School Grounds: Trees or shrubs that present a fire hazard or wind hazard or provide areas for an intruder to hide Streams in close proximity Electrical wires Gasoline or propane tanks Natural gas lines Fences in need of repair Other hazards (List):	

Plan 2: Section 1: Risk Assessment Risk Assessment Tool 4: Neighborhood Checklist

Identifying Potential Hazards in the Neighborhood and Community Checklist

Being aware of the potential hazards in the community can affect your school planning process. For example, knowing that a facility uses toxic chemicals in processing helps you plan for a hazardous materials emergency. Locate the potential hazards shown below on a street map of your community. A tool to help you identify some of the hazards within a 1 mile radius is http://myhazards.calema.ca.gov/.

	Facilities containing toxic, chemically reactive, and/or radioactive materials. Note: Be sure to include both manufacturers and users (e.g., gas stations).
	High-voltage power lines.
	Transportation routes of vehicles carrying hazardous materials (e.g., truck routes and railroad rights of way).
	Underground gas and oil pipelines.
	Underground utility vaults and above-ground transformers.
	Multi-story buildings vulnerable to damage or collapse (e.g., unreinforced masonry construction).
	Water towers and tanks.
	Creeks and/or waterways.
П	Other:

Plan 2: Section 1: Risk Assessment Risk Assessment Tool 5: Possible Hazards

Possible Hazards

- Biological and Chemical Weapons: Biological agents are infectious microbes or toxins 1. that are used to produce illness or death in people, animals or plants.
- 2. Civil Disturbance: Any incident that disrupts a community where intervention is required to maintain public safety.
- 3. Dam Failures: Dam failures are potentially the worst flood events. When a dam fails, a gigantic quantity of water is suddenly let loose downstream, destroying anything in its path.
- 4. Droughts: Drought is defined as a water shortage caused by a deficiency of rainfall.
- 5. Earthquakes: A sudden rapid shaking of the earth by the breaking and shifting of rock underneath the earth's surface. They may cause buildings and bridges to collapse; disrupt gas, electric and phone service. Earthquakes are sudden events with the effects described by the Richter scale.
- 6. Extreme Heat: Extreme heat is defined as temperatures that hover 10 degrees or more above the average high temperature for the region and last for several weeks.
- Fires: The outbreak of fire or smoke within the school building, Portable-mobile units, 7. and out buildings or in grass, fields, brush and woods around school buildings. Fires can be triggered by lightening, high winds, earthquakes, volcanoes, floods and human error or intent.
- Floods: Can be slow or fast rising, but will generally develop over a period of days. Floods can occur from large-scale weather systems that generate either prolonged rainfall or winds. May also occur from locally intense thunderstorm, snow melt, ice jams, and dam failures.
- 9. Hailstorms: Hailstorms are an outgrowth of severe thunderstorms in which balls of irregularly shaped lumps of ice greater than 0.75 inch in diameter fall with rain.
- 10. Hazardous Materials Incidents: Hazardous materials are chemical substances, which if released or misused can pose a threat to the environment or health. These substances are most often released as a result of transportation accident or at a chemical plant.
- 11. Hurricanes: Tropical waves that grow in intensity and size to tropical depressions and then turn into tropical storms - usually with a constant speed of 74 mph or more.
- 12. Intruder/Hostage: An intruder is defined as an individual who loiters are causes a disturbance on the school campus. A Hostage situation involves one or more persons being held against their will by one or more individuals.

Plan 2: Section 1: Risk Assessment

Risk Assessment Tool 5: Possible Hazards

- 13. Landslides: Landslides occur when masses of rock, earth or debris move down a slope. Landslides may vary small or very large and that can move at slow or very high speeds.
- 14. Nuclear Accidents: The potential danger from an accident at a nuclear plant is exposure to radiation. Radioactive materials are composed of atoms that are unstable and an unstable atom gives off its excess energy until it becomes stable- this energy is radiation. The process by which an atom changes from an unstable state to a more stable state by emitting radiation is called radioactive decay or radioactivity.
- 15. Severe Winter Storms: Severe winter storms consist of extreme cold and heavy concentrations of snowfall or ice.
- 16. Snow Avalanches: Sliding snow or an ice mass that moves at high velocities.
- 17. Terrorism: Terrorism is the use of force or violence against persons or property in violation of the criminal laws of the United States for the purposes of intimidation. coercion or ransom.
- 18. Thunderstorms: Thunderstorms bring heavy rains (which cause flooding), strong winds, hail, lightening and tornadoes.
- 19. Tornados: A tornado is rapidly rotating vortex or funnel or air extending ground ward from a cumulonimbus cloud. Can have winds up to 300 mph.
- 20. Volcanic Eruptions: A volcano is a mountain that opens downward to a reservoir of molten rock below the surface of the earth. When pressure from the gases and molten rock become strong enough to cause an explosion, eruption occurs.

Risk Assessment Tool 6: Hazard & Risk Assessment Worksheet

Hazard and Risk Assessment Worksheet

Instructions: Use this worksheet when analyzing the potential risk presented by each hazard you identify at your school. List possible hazards down the left column and rank according to frequency, magnitude, warning, severity and risk priority.

Risk	Frequency	Magnitude	Warning	Severity	Risk Priority
	4 Highly Likely 3 Likely 2 Possible 1 Unlikely	4 Catastrophic 3 Critical 2 Limited 1 Negligible	4 Minimal 3 6-12 hrs 2 12-24 hrs 1 24+ hrs	4 Catastrophic 3 Critical 2 Limited 1 Negligible	High Medium Low
	4 Highly Likely 3 Likely 2 Possible 1 Unlikely	4 Catastrophic 3 Critical 2 Limited 1 Negligible	4 Minimal 3 6-12 hrs 2 12-24 hrs 1 24+ hrs	4 Catastrophic 3 Critical 2 Limited 1 Negligible	☐ High ☐ Medium ☐ Low
	4 Highly Likely 3 Likely 2 Possible 1 Unlikely	4 Catastrophic 3 Critical 2 Limited 1 Negligible	4 Minimal 3 6-12 hrs 2 12-24 hrs 1 24+ hrs	4 Catastrophic 3 Critical 2 Limited 1 Negligible	☐ High ☐ Medium ☐ Low
	4 Highly Likely 3 Likely 2 Possible 1 Unlikely	4 Catastrophic 3 Critical 2 Limited 1 Negligible	4 Minimal 3 6-12 hrs 2 12-24 hrs 1 24+ hrs	4 Catastrophic 3 Critical 2 Limited 1 Negligible	☐ High ☐ Medium ☐ Low
	4 Highly Likely 3 Likely 2 Possible 1 Unlikely	4 Catastrophic 3 Critical 2 Limited 1 Negligible	4 Minimal 3 6-12 hrs 2 12-24 hrs 1 24+ hrs	4 Catastrophic 3 Critical 2 Limited 1 Negligible	☐ High ☐ Medium ☐ Low
	4 Highly Likely 3 Likely 2 Possible 1 Unlikely	4 Catastrophic 3 Critical 2 Limited 1 Negligible	4 Minimal 3 6-12 hrs 2 12-24 hrs 1 24+ hrs	4 Catastrophic 3 Critical 2 Limited 1 Negligible	☐ High ☐ Medium ☐ Low

Note: All hazards with a risk rating of High or Medium should be considered in your Site Emergency Response Plan.

Plan 2: Section 2: Incident Command System

2.2.1 Incident Command System (ICS)

The CMP-Network Emergency Response Plan and the Site Emergency Response Plan utilize the Incident Command System (ICS) to manage emergencies affecting the CMP-Network. ICS is an internationally recognized model for command, control and coordination of emergency response. ICS is a flexible management structure which provides for the activation of appropriate roles and response functions for a given situation. ICS is designed to expand or collapse as circumstances dictate.

2.2.1.1 Incident Management

The Incident Command System provides direction and control over emergency response activities within the CMP-Network. Two types of command structures are incorporated into the plan:

Single Command

A Single Command is an incident which CMP-Network or a CMP-Site oversees.

2. Unified Command

A Unified Command is the coordination of activities between multiple agencies to respond to an incident. Many emergencies will require additional resources from cooperating agencies and/or assisting agencies such as police, fire or medical.

While the Incident Commander (IC) will form part of the Unified Command, the individual who assumes the Incident Commander position for a particular emergency is normally the ranking official on-scene from the agency having primary responsibility/authority over on-scene operations. This will be decided at the time of the emergency.

By adopting this structure the CMP-Network is able to respect the autonomy of individual school sites while providing support to them as needed and applying jurisdictional control over matters requiring such.

2.2.1.2 Transfer of Command

The highest ranking official at an emergency site, according to the CMP-Network Emergency Response Plan or Site Emergency Response Plan, assumes overall responsibility for response activities until such time as a higher authority is able to take over these responsibilities.

For example, a teacher on a field trip may be required to fulfill the role of Incident Commander until such time as a higher authority (police or Principal) is able to assume responsibility for the response activities.

Plan 2: Section 2: Incident Command System Site Emergency Response Team: ICS (CONFIDENTIAL)

 In the case of a broader-based community emergency, an Incident Commander may be asked to assist at the municipal level until such time as a CMP-Network resource arrives.

Transfer of command may also be necessary for personnel shift changes for long or extended incidents.

When a transfer of command occurs, the person being relieved is responsible for briefing the incoming authority and ensuring notes are scribed.

Once command has been transferred to the proper authorities (i.e. fire or police department) the Site Incident Commander is still responsible for contributing to decisions regarding stakeholders' safety with the authorities, now Incident Commander.

2.2.1.3 Designated Alternates

Each position identified in the SERP shall be assigned at least one designated alternate, except for the Incident Commander position, which shall have two designated alternates. It is the responsibility of the assigned individual to ensure his/her designated alternate is versed on the responsibilities and reporting structure of the position.

2.2.1.4 Assignment of Responsibilities

When preparing the SERP it is acceptable to assign an individual to more than one position within the Site Emergency Response Team (SERT) chart. It is recommended that an individual assigned to the role of Operations Officer not be assigned another position.

At the time of an emergency an individual may be required to assume more than one role, based on the level of the emergency and which roles are activated by the Incident Commander.

2.2.1.5 Levels of Emergency

An emergency is a set of circumstances requiring action; action varying in degree and involvement with a number of cooperating agencies or jurisdictions.

Emergencies can be categorized according to level of incident: these levels are based on severity and risk factors. See Table 2.2.1 for Levels of Emergency.

Level I conditions should be reported to CMP-Central Admin through established protocols. Affected Sites should consult with CMP-Central Admin at a Level II and/or Level III emergency condition.

Table 2.2.1: Levels of Emergency

Level	Definition	Example of Level Incident
Level I	An unplanned occurrence which interrupts the normal course of business but to which standard internal response protocols apply.	Assault / Fighting / Disturbance / Injured Student / Disorderly Conduct / Wild Animal / Unauthorized Visitor / Medical Emergency / Trespassing / Severe Vandalism / Inclement Weather / Power Failure (Prolonged)
Level II	An unplanned occurrence which interrupts the normal course of business, requires enhanced response protocols, has the potential to escalate to Level III and may require response from external agencies.	Bomb Threat / Suspicion of Weapons / Bus Accident - Non Fatal Injuries / Serious Illness or Injury / Missing Child / Suicide on Network Property / Utterance of Threat / Train Derailment / Aircraft Crash / Motor Vehicle Accident / Psychological Trauma / Contamination of Food or Water / Unlawful Demonstrations or Walkouts
Level III	An unplanned occurrence that discontinues normal business functions, and requires a broadbased response by the District and/or a third party such as an emergency service or government agency.	Armed Intruder / Hostage Taking / Child Abduction / Shooting / Stabbing / Physical or Sexual Assault / Bus Accident - Fatal Injuries / Infectious Disease / Explosion / Gas Leak / Fire Incident / Wild Fire / Hazardous Spill / Sour Gas / Severe Natural Disaster / Earthquake / Flooding

2.2.2 Site Emergency Response Plan Functions

The CMP Network and Site Emergency Response Plan (SERP) are consistent with SEMS/NIMS (Standardized Emergency Management System and National Incident Management System) and consist of the following five functions: Management, Planning and Intelligence, Operations, Logistics, and Finance /Administration.

2.2.2.1 Management (Incident Command)

During an emergency, the Incident Commander (IC) is responsible for directing response actions from a designated Command Post. To effectively direct response actions, the IC must constantly assess the situation and develop and implement appropriate strategies. The IC must be familiar with the available resources, accurately document all response actions, and effectively communicate response strategies to others participating in the response. This function is typically directed by the Principal or their designee, as the IC. The IC is assisted in carrying out this function with a:

- Public Information Officer
- Safety Officer
- and Agency Liaison

2.2.2.2 Planning and Intelligence

Planning and Intelligence involves the use of various methods to efficiently gather information, weigh and document the information for significance, and actively assess the status of the emergency. This understanding and knowledge about the situation at hand is vital to the effective management of Under SEMS/NIMS, this function is supported by two staff a response. members, one involved with "Documentation" and the other with "Situation Analysis." Within the CMP-Network Sites, "Documentation" may be referred to as 'Scribe" and "Situation Analysis" may be performed by a "Communications" position. Both of these positions, if assigned at the discretion of the Principal, will report directly to the Incident Commander (Principal or designee) unless a Planning/Intelligence Officer is assigned.

2.2.2.3 Operations

All emergency response actions are implemented under the Operations function. This function is supported by staff performing first aid, crisis intervention, search and rescue, damage assessment, evacuations, and the release of students to parents. Within CMP, these activities are performed by the following teams, under the direct supervision of the Incident Commander (Principal or designee), unless an Operations Officer is assigned: First Aid/Medical Team; Search and Rescue Team; Assembly Area Team; Fire Suppression/Hazmat Team; Psychological First Aid Team; Request Gate Team; and Reunion Gate Team.

Site Emergency Response Team: ICS (CONFIDENTIAL)

2.2.2.4 Logistics

The Logistics function supports emergency operations by coordinating personnel, assembling and deploying volunteer teams, providing supplies, equipment, services, site security, damage assessment, and facilitating communications among emergency responders. Within the CMP-Network, these activities are performed by the Security/Utilities Team and Supply/Equipment Team, both of which report directly to the Incident Commander unless a Logistics Officer is assigned.

2.2.2.5 Finance and Administration

The Finance/Administration function involves the purchasing of all necessary materials, tracking financial records, timekeeping for emergency responders, and recovering school records following an emergency. Within the CMP-Network, these activities may be performed by various positions within the A Finance/Administration Officer is responsible for gathering reports from the Incident Commander.

The five functions of Site Emergency Response Planning are used to create the Site Emergency Response Teams. The teams are modeled after SEMS/NIMS and adapted for CMP school sites.

2.2.3 Site Emergency Response Team (SERT)

The Site Emergency Response Team (SERT) is comprised of five teams named for their functions, and is responsible for directing the site emergency response activities. The teams are 1) Incident Command Team, 2) Planning and Intelligence Team, 3) Operations Team, 4) Logistics Team, and 5) Finance and Administration Team.

The eight key positions of the Site Emergency Response Team are referred to as ACT, Activated Command Team, and are referred as such throughout this document. The eight key positions are 1) Incident Commander, 2) Public Information Officer, 3) Safety Officer, 4) Agency Liaison Officer, 5) Planning and Intelligence Officer, 6) Operations Officer, 7) Logistics Officer, and 8) Finance/Admin Officer.

For planning purposes, sites with small staffing complements should first assign staff to the areas of Operations Officer and then continue through the organization chart as follows: Planning Intelligence Officer, Logistics Officer and Finance Administration Officer.

Assignments should be made on the basis of best qualified for the position, and not on normal job posting or seniority. At the time of an emergency the Incident Commander will activate roles based on the severity of the emergency and need for a particular function.

California Government Code, Chapter 8, Section 3100 states: "...all public employees are hereby declared to be disaster service workers subject to disaster service activities as may be assigned to them by their superiors or by law." In accordance with these provisions, all staff members are considered "disaster service workers" during emergencies and must remain on site to carry out assigned responsibilities.

School staff should be familiar with emergency procedures and any assigned responsibilities. During an emergency, staff will serve on response teams and implement response procedures. If a teacher has been assigned to a position in the following list, the teacher will first accompany the students to the Assembly Area, where they will be reassigned to another teacher. The teacher will then carry out assigned responsibilities.

2.2.3.1 Management (Incident Command Team)

The Incident Command Team is responsible for directing school emergency response actions and activities. The Incident Command Team is comprised of the Incident Commander, Public Information Officer, Safety Officer and Agency Liaison Officer.

2.2.3.1.1 Incident Commander

The Site Emergency Response Team is lead by the Incident Commander (IC) which is the Principal or IC Designee. In the event that neither the Principal nor his/her designee is able to perform the duties, as described in this document, the Central Admin Director will take charge of the response upon notification of the situation and appoint an incident commander for the incident site.

The IC is responsible for ensuring the site fulfills its obligations related to the development, updating and filing the Site Emergency Response Plan. The Incident Commander also directs the activities of all other teams.

Assi		m		te	8

1.	Incident Commander: Principal:
2.	IC Designee:
3.	IC Designee:

1. Primary Responsibilities:

- a. Activate the Site Emergency Response Plan and manage the overall strategic direction, control and coordination of emergency and post-emergency measures.
- b. Directing the Incident Command Team and all other emergency teams.
- c. Constantly assess the situation.
- d. Ensure adequate safety measures are in place to execute the SERP.
- e. Serve on CMP-Network or community emergency response committees as requested by the Executive Director of CMP or CMP Network Safety Coordinator.

2. Reports To:

- a. Executive Director
- b. Outside Emergency Services

3. Authority:

- a. Activate the SERP
- b. Approve SERP and its implementation
- c. Call relevant SERT members into action
- d. Declare the boundaries of the emergency zone

- e. Use appropriate site resources, equipment and assets to address emergency situations
- f. Direct site personnel to perform tasks related to the emergency but not place them in danger
- g. Communicate with CMP's Executive Director
- h. Engage appropriate outside services as needed
- i. Deactivate the SERP when appropriate

4. Supplies:

- a. Copy of the sites Emergency Procedures
- b. Campus map

2.2.3.1.2 Public Information Office (Network Appointed)

The Public Information Officer (PIO) is the official spokesperson for the school site in an emergency and is responsible for communicating with the media and delivering public announcements. This position is network appointed.

Assignments:

- 1. Lisa Coates
- 2. Executive Director: _____ 3. Principal: _____
- 1. Primary Responsibilities:
 - a. Act as contact person for all media.
 - b. Provide stakeholders with the information for all media.
 - c. Maintain a log, Appendix 2-2-2, of all PIO actions and communications.
 - d. Prepare statements for disseminating to the public.
- 2. Reports to:
 - a. Executive Director
 - b. Incident Commander
- 3. Authority:
 - a. Grant or refuse access to areas within the emergency zone to the media.
 - b. Use appropriate outside services to provide auxiliary information on news issues related to the emergency.
- 4. Supplies: see Incident Commander Section
- 5. Assembly Location: Command Post

2.2.3.1.3 Safety Officer

The Safety Officer ensures all emergency activities are conducted in a safe manner.

Assignment:	
Designated Alternate:	

- 1. Primary Responsibilities:
 - a. Maintain all records and documentation as assigned by the Incident Commander.
 - b. Monitor drills, exercises, and emergency response activities for safety.
 - c. Develop and recommend measures to assure personnel safety.
 - d. Identify safety hazards.
 - e. Ensure all responders are using appropriate safety equipment.
- 2. Reports to: Incident Commander
- 3. Authority: May directly stop or modify any activities that may pose an imminent danger to responders or victims, or potentially create a hazardous situation.
- 4. Supplies: see Incident Commander Section
- 5. Assembly Location: Command Post

2.2.3.1.4 Agency Liaison Officer

The Agency Liaison coordinates the efforts of outside agencies such as the police and fire by ensuring proper flow of information between the Incident Command and the agencies.

Assignment:		
Designated Alternate:		

- 1. Primary Responsibilities:
 - a. Brief agency representatives on current situation, priorities and planned actions.
 - b. Ensure coordination of efforts by periodically keeping the Incident Commander informed of agencies' action plans.
 - c. Update agency representatives as necessary.
- 2. Reports to: Incident Commander
- 3. Authority: Coordinate non-tactical personnel of assisting and cooperating agencies.
- 4. Supplies: see Incident Commander Section
- 5. Assembly Location: Command Post

2.6.3: Evaluation: Incident Summary Report

Incident Summary Report

		I	Pag	e #		
Donort	and	authoritted.	4	44-	CAAD	1

The following items should be included in an Incident Summary Report and submitted to the CMP Safety Coordinator within 7 days of the incident.

- Compile a brief description of facts caused by the emergency.
- Provide an explanation of the site's approach to addressing the emergency.
- Create a timeline of when events occurred, individuals/agencies were informed, aid was provided, and information was delivered to stakeholders.
- Assess the extent of the damage caused by the emergency and compose a statement about the site's profile after the emergency.
- Include minutes and notes taken from any meetings that were help in relation to the incident.
- Include a copy of all documentation recorded on the incident.
