

Boomwhacker Beatz

Teachers Notes

Introduction

Congratulations on your purchase of the **Boomwhacker Beatz** Curriculum program for elementary or primary classroom music lessons. We know you'll love this program, and your students will enjoy the music and activities in it.

There are several different ways to make use of this program, and you can choose yourself which way best suits your methods and style of teaching.

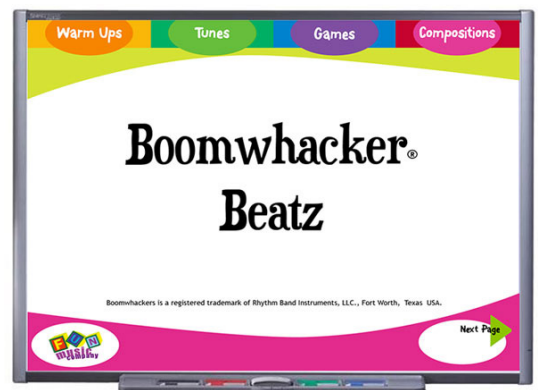

Technical Requirements

You will need an interactive whiteboard OR a projector attached to a computer in order to use this product. It works absolutely fine with just a projector if you don't have an interactive whiteboard in your classroom.

You have two choices:

OPTION ONE - You can use the independent application included
OR..

OPTION TWO You can use the version written for the ActiveInspire or SMART Notebook.

The independent application offers a very reliable platform that works on either windows or mac computers, however it doesn't have the sequential lesson plan version.

If you're happy just using the navigation links at the top, and customising your lessons that way, then just choose that version.

If however you prefer to have your lessons laid out in sequence, then choose the ActiveInspire or SMARTNotebook versions. To use these you will need whiteboard software on your computer.

In the ActiveInspire and SMARTNotebook versions we have provided a complete file, which is the best way to use it if you can, and we've also supplied individual lessons. The reason we supply the individual lessons is that we know it may not run well on some computers as a combined file. The file is over 200MB, which means it will take a lot of computer resources, and it may not run well. If you experience problems with timing or frequent crashing, please use the individual lessons, or option one, the independent software.

If you wish to use those versions and you will need whiteboard software on your computer - either SMARTNotebook or ActiveInspire.

ActiveInspire Personal Edition is FREE - and you can download it by following the links included in your product. This is the software we recommend for users without an interactive whiteboard. It is available for either Windows or Mac platforms.

This is a good thing, as it allows a greater level of flexibility and YOU are also able to customize the program to suit your own needs.

Suggested Boomwhacker Shopping List

With this program, you ideally want to have enough boomwhackers so that you can have **FOUR** groups of students within your class playing only four colors. That means that **the number of sets to purchase is your maximum number of students divided by four.**

If you don't have that many, then there are a few variations you can do to as detailed below.

However ideally you would purchase this many of the basic sets, depending on your class size:

20 Students = 5 sets

24 Students = 6 sets

28 Students = 7 sets

32 Students = 8 sets

There are many different packages and combinations of boomwhacker sets available. There are **diatonic** (which contain the full C major scale), and **pentatonic** (which only contain five different notes).

We recommend initially purchasing the **standard diatonic set** from C-C. Eventually, when you're experienced using them, you can of course add the bass tubes, and octavator caps if you have them.

If you happen to have only the pentatonic set, then don't worry, as many of the activities are still playable, and they all have the same colors. They are just missing the F's (light green) and B's (magenta). These notes are only contained in one of the pieces anyway, and the more advanced composition activities.

Alternatives if you don't have enough boomwhackers

If you don't have enough sets for one per child, you can use either or both of the following modifications:

1. In the warmup tunes, have purples and oranges play together, anything that is a purple or orange.
2. Have 'magenta's (B's) play with the dark Greens (G's) to play any G's. (Magenta is not used at all in the warmups, tunes or games.) This makes a G chord, which works well in 90% of places G's are used.

Boomwhacker Playing Technique

We've found the best way to have students play them is to hold them in one hand, and play into the other hand. Of course if you have an abundance of Boomwhackers, then you can give a PAIR to each child and have them hit them together.

However, if you're sitting on the floor, and you have carpet, then playing them on the floor is also acceptable. If you're on a hard floor, then we would not suggest it, as it will damage your boomwhackers over time.

There is one special technique used in these materials. It is called the 'rumble', or a percussionists 'roll'.

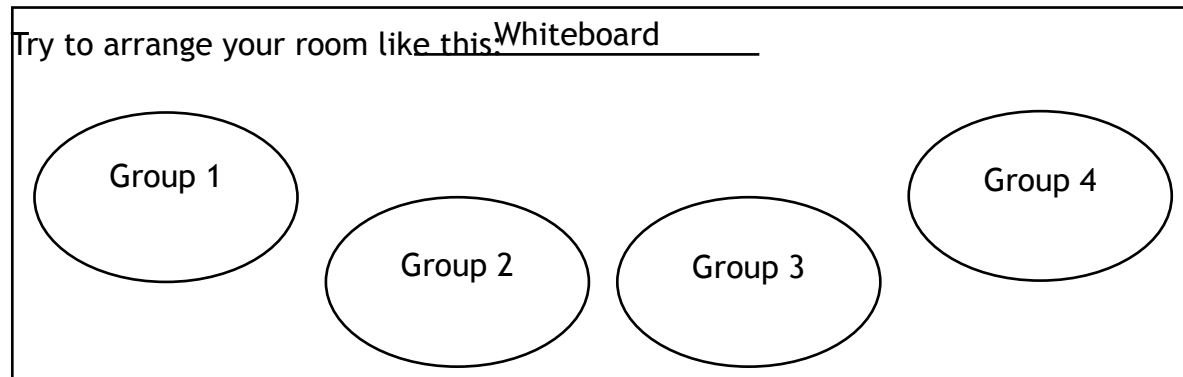

To achieve this, just hold one hand a few inches above the ground and play it up and down in a rapid motion.

Just watch the training video included in your product to see what this technique looks like.

Setting up the classroom

For most of the warmup tunes, pieces and games you will need them in four color groups. You may have five groups for some of the warmups, but mostly it is four. This way, similar colors are always playing together.

How to use the program

There are four types of activities in the program: Warmups, Tunes, Games and Composition. And you can jump to any of these sections from the menu at the top of the screen. You can do as many or as few of these topics as you like in a lesson.

Section 1 “Warmups”

The warmups are simple little pieces where the students have to play their boomwhacker when the matching color circle comes on the screen.

In the first one ‘Whacky Beatz’ the students can simply play in time first. ie. ♪ ♪ ♪ ♪

Once they have done that, then you can try one of the alternative rhythm patterns suggested down the left hand side of the screen.

In each of the following warmup tunes, the rhythm suggested is written in small print on the left hand side of the screen

This is for the teachers reference only - it is not really intended that the students read or necessarily understand this notation at this stage.

Make sure you learn the rhythm together as a class first, before playing the video.

Just have the students play it in echo with the teacher.

On the right hand side of the screen the boomwhackers required for this particular activity are indicated.

The warmups only use pentatonic notes - i.e. C, D, E, G and A.

If you don't have enough boomwhackers

- Use the high 'C's that are always included in the basic set.
- Have one group play purple and orange, anything that is purple OR orange
- Add the magenta boomwhackers (B's) to the dark green group (G's)

Section 2 “Tunes”

There are five performance pieces to choose from: “Boom Boom Beat”, “Shape Dance”, “Elephants Walk and Monkeys Run”, “Percussion is cool”, and “Fruit Salad”. The music is reproduced below for your reference.

You’ll notice that we have used a simplified notation style for this: we have omitted rests and barlines, and we have not given indication of exactly how many repeats etc.

This is quite deliberate: it is because we didn’t want to confuse early elementary or primary children with too much notation. The music is really there as a visual reminder of what to do, but basically students learn these pieces as an aural activity, and the screen is just a cue.

If it bothers you, and you want the rests there, then you can go right ahead and put them in yourself using the SMART notebook or ActiveInspire tools - its not hard to do at all.

You can visit this page for information on how to do that:

<http://funmusicco.com/whiteboard-resource-packs/>

Piece #1: Boom Boom Beat

In ‘Boom Boom Beat’ the tune builds up - so it starts with just the purple group, then the yellow is added, the green and then finally the red. Once it is going, it starts to speed up, so

Boom Boom Beat

Build up, then accelerate:

Pur - ple

Yel -low

Green Green

Red Red Red!

Music with Boomwhackers being played

Backing music without Boomwhackers

Piece #2: Shape Dance

In this piece, you can give each group a “shape” name.

Group one is ‘Circles’, group two are ‘triangles’, group three ‘semicircles’ and group four are ‘squares’

Have them practice their rhythms in turn. If you’re lucky enough to have Remo ‘sound shapes’ then you can also use them for this piece.

The introduction is not notated on the screen - but just listen and you’ll pick it up very quickly. Each group just echo’s the track in turn, then you’ll easily hear when the ‘A’ section begins.

A:

			
Cir - cle Cir - cle	Tri - an - gle Tri - an - gle	se-mi-cir-cle se-mi-cir-cle	square square

B:

Piece #3 “Elephants Walk and Monkeys Run”

In our trial lessons this piece was very popular with young classes, from grade one upwards.

First, learn the ‘elephants walk’ and ‘monkeys run’ rhythms together, and then try the A section as a group.

You can then ask them to discuss what the “notes on top of one another” mean in the B and C sections.

Depending on the students age, you can also use this to discuss the concepts of ‘Rondo form’ and ‘Accellerando’ (in the C section).

Piece #4 - "Percussion is cool"

This is very popular with older children, and we have found it works right up to middle school aged children.

First, learn the 'percussion is cool' rhythm as a group. Have them echo it back, and you can optionally talk about how the syllable 'per' is actually *before* the beat or is an 'upbeat'.

The whole form repeats, so you can optionally change to other percussion instruments (djembes, hand percussion, junk percussion etc) for the second repeat if you wish.

You can also add the following ending by teaching it aurally - which we felt it was too complicated to notate on the screen:

Music with Boomwhackers being played

Tune #5 - Fruit Salad

This, like some of the others, uses word sounds to help with learning rhythms. Hopefully the colors of the boomwhackers also match the colors of the fruits!

There is an optional bass line part to learn as well for this piece, presented on a second screen.

Tune #5: Fruit Salad

Section 3 - Games:

The games are intended to be quick five minute activities at the end of a lesson.

Game #1 - Echo Rhythm

Echo Rhythm is quite self explanatory, and you probably do this a lot anyway. However, when they can't SEE you do it for them, it has an extra level of challenge! There are several on the screen, and just choose one, depending on the students level.

The screenshot shows a digital interface for a game called 'Echo Rhythm'. At the top, there is a horizontal navigation bar with four colored buttons: 'Warm Ups' (orange), 'Tunes' (green), 'Games' (blue), and 'Compositions' (pink). Below this bar, the title 'Echo Rhythm' is displayed in a large, black, handwritten-style font. Underneath the title, there are three identical horizontal bars, each containing a play button icon (a green triangle inside a white circle) and a progress bar (a thin orange line). The bottom of the interface features a pink footer area. On the left side of the footer is a logo for 'FUN music company' with the word 'FUN' in large, colorful letters and 'music company' in smaller text below it. On the right side of the footer, there are two navigation buttons: 'Previous Page' (a yellow arrow pointing left) and 'Next Page' (a green arrow pointing right).

Game #2 - Poison Rhythm

In this game the students have to echo the rhythm played except if the poison rhythm is played, which is:

don't play this one!

An indication (tick or cross) will appear on the screen instantly afterwards, so the students will know whether or not it was the poison rhythm.

If they make any noise at all with their boomwhacker, then they are 'out' and have to sit down, or whatever rule you make up. This can be a way to 'pack up' the boomwhackers at the end of the lesson. Once they are 'out' then they have to put their boomwhacker away where it belongs.

Copy the rhythms you hear on Boomwhackers... except if you hear this rhythm:

Don't play this one!

And if you play... your'e out!

Everyone plays together

Game #3 - Music Line Wizard

This is intended as a little introduction to knowing where the notes sit on the manuscript. What happens is the notes appear on the screen, and the students have to play them, just like in the warmup activities. However, once they have done a few, a black one will appear, and they have to identify if they have to play or not, based on the notes position, rather than its colour. Eventually its colour is revealed, so they will find out if they were right or not.

Again, you can have students go 'out' if they play at the wrong time if you wish.

Game #3 'Music Line Wizard' and Game #4 'Mystery Boomwhacker' might present a potential problem, in that the first couple of levels only use two & three boomwhackers respectively. If you don't have enough for the whole class to have just a red or purple, you can always have just some of the class play, and then the others have to indicate with their hands with some sort of symbol which they think it was (red or purple)

The screenshot shows the 'Music Line Wizard' game interface. At the top, there are four colored tabs: 'Warm Ups' (orange), 'Tunes' (green), 'Games' (purple), and 'Compositions' (pink). Below these is a yellow banner with the title 'Music Line Wizard'. The main area features a large grey treble clef on the left and a five-line musical staff in the center. To the left of the staff, there are two instructions: 'Play your boomwhacker when your note is on the screen.' and 'When the black note comes on work out if your color should play or not from its position on the music staff.' To the right of the staff, there are four levels of boomwhacker color bars: 'Level One' (red, purple), 'Level Two' (red, yellow, purple), 'Level Three' (red, yellow, green, purple), and 'Level Four' (red, orange, yellow, green, purple). Below the staff, there is a green play button icon and a black circle with a white question mark. At the bottom, there is a pink banner with the 'FUN music company' logo on the left, and navigation buttons for '< Levels', 'Previous Page', and 'Next Page' on the right.

Game #4 - Mystery Boomwhacker

This game is intended to be an aural training exercise. The objective is to have students learn and recognize the pitch of the boomwhacker they are playing. The coloured balls come on the screen, and the students play if their color is on the screen. However, then a question mark will appear, and they have to play if the boomwhacker they are holding matches the sound they hear from the question mark.

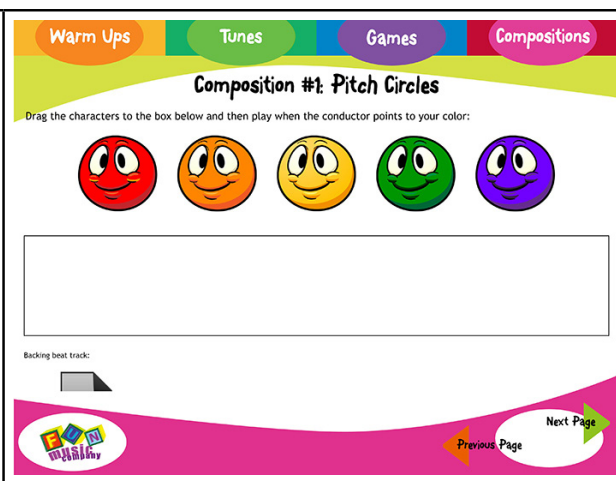

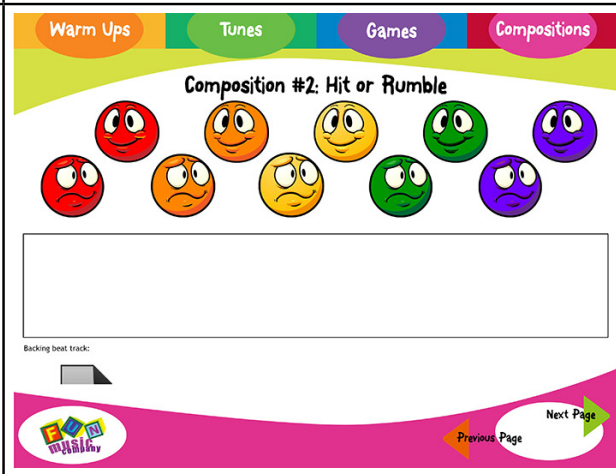

Section 4 - Composition

This is where your students can be a bit creative and take turns to make musical decisions by moving things around the board.

In every case there is a backing beat provided, so they can optionally play their composition along with the beat. It may be wise to have a student at the board 'conducting' so they know where they are up to in the piece.

You can see children working with an early development version of this idea here:

<http://funmusicco.com/boomwhackers-composition/>

<p>Composition #1</p> <p>This is the basic version of this activity. Students learn a rhythm pattern together, which could be as simple as ♩ ♩ ♩ ♩ , then choose an order to play it in.</p>	
<p>Composition #2</p> <p>In this one they either do 'Hits' for the normal face design, or a 'rumble' for the funny face with the curvy mouth.</p>	

Composition #3

In this one the class needs to first decide on what each of the face designs mean.

Here is one suggestion:

“i am happy now!” (♫♫♫♫) for the happy face and “No I’m scared!” (♫♫♫) for the scared one.

However, encourage the children to define these rhythms for themselves.

Warm Ups Tunes Games **Compositions**

Composition #3

Decide as a class what these two face symbols mean. One might be a rumble, and one might be a specific rhythm: it is up to you. Once you've decided what they mean, drag them down to the box below to create your class composition.

Backing beat track:

Previous Page Next Page

Composition #4

Here we are just dealing with unpitched rhythmic notation, so all boomwhackers can play together in unison.

You may even like to vary things around by using other non-pitched percussion for this activity.

Warm Ups Tunes Games **Compositions**

Composition #4: Rhythm

Drag the rhythm cells below to the line below to make a class composition, then play it with the backing music:

4

4

Backing beat track:

Step By Step Lesson Plans

In the following section we have presented ten complete lessons based on the Boomwhacker Beatz material.

You can either

1) Use the included 'step by step' Active Inspire or SMART Notebook files, and walk through the activities one at a time. This is good because it is pre-planned, and you simply step through the lesson, but bad in that you don't have the ability to instantly jump to a favorite song or game.

If you're using the 'step by step' version, you can load the entire ten week course by using the combined file, or you can use the individual lessons.

If you experience problems with your computer while using the combined one, we suggest using the individual lesson files. If you have a reasonably new computer it shouldn't be a problem to use the combined version.

2) Use the regular 'Boomwhacker Beatz' interface, and simply navigate to each idea via the top menu. This gives you the flexibility to instantly jump to your children's favourite songs or games instantly, without having to load a different file.

Either way, the activities are all described here in the lesson plans. Obviously if you choose the computer interface a screen for the 'introduction' and 'music theory' elements are not included, but you can do this on your traditional pen whiteboard if necessary, or just orally, without any visual cues.

Lesson Outline

Lesson One	Boomwhacker Playing technique and playing in time
Lesson Two	Long and Short Notes
Lesson Three	What is a Rest?
Lesson Four	Rhythm - Different Notes
Lesson Five	Notes and Rests
Lesson Six	What is Tempo?
Lesson Seven	What is Pitch?
Lesson Eight	What is Rhythm?
Lesson Nine	Pitch - Lines and Spaces
Lesson Ten	Making an Ensemble

Lesson One

Activity #1: Introduction and Discussion *What are Boomwhackers?*

These discussion slides are designed to facilitate discussion in the class, and therefore there is not necessarily a right or wrong answer. You can simply use the whiteboard pen and fill in the classes answers in the box.

you can expect answers like:

'Tuned Percussion Instruments'

'Tuned Notes'

'Good Fun!'

'Instruments you play as a group'

Ways to lead the discussion:

- What do you notice about these instruments?
- Are they tuned or untuned instrument?
- What instrument family do they belong to?

This is an 'investigative' approach - we are encouraging the children to discover what Boomwhackers can do.

Warm Ups Tunes Games Compositions

What are Boomwhackers?

Previous Page Next Page

Activity #2: Introduction and Discussion *How to play Boomwhackers Properly*

This allows us to establish the classroom rules about boomwhackers in a way that is most likely to be successful.

If the children make up their own rules, then we hope that they might be respectful of them.

Sample answers you might expect:

How ~~SHOULD~~ ~~we~~ ~~play~~ boomwhackers?

- hitting on the carpet
(you decide the rules for your class)

What should we NOT do with boomwhackers?

- Put them in our mouth
(again, you decide the rules for your class)

Activity #3: Warmup Song: 'Whacky Beatz'

This song requires Red, Orange, Yellow, Dark Green and purple Boomwhackers. Therefore set them up in five groups if possible.

Slide for Activity #3: Warmup Song: 'Whacky Beatz'. The slide features a navigation bar at the top with 'Warm Ups' (orange), 'Tunes' (green), 'Games' (purple), and 'Compositions' (pink). Below the bar, the title 'Wacky Beatz' is centered. On the left, there is a 'Lesson' icon and a 'Rhythm options:' section with four musical notations. In the center, there is a yellow smiley face and two orange vertical bars. On the right, there is a bar chart with five bars of increasing height. At the bottom, there is a pink banner with a 'Lesson' icon, a 'Previous Page' button, and a 'Next Page' button.

Activity #4: Music Theory Skills: Note Types

We have deliberately not included answer text in this, so that you can use whatever terminology you wish. You may choose to use formal American (Whole, Half Quarter Note), formal European (Semibreve, Minim, Crotchet), or phonetic time names from Orff or Kodaly.

The whiteboard slide just allows you to start with what they know, and discuss it in the way you wish to.

Slide for Activity #4: Music Theory Skills: Note Types. The slide features a navigation bar at the top with 'Warm Ups' (orange), 'Tunes' (green), 'Games' (purple), and 'Compositions' (pink). Below the bar, the title 'Music Theory Skills' is centered, followed by 'Note Types'. In the center, there is a diagram showing a whole note branching into two half notes, which then branch into four quarter notes. To the right of the diagram, there are three horizontal lines for writing. At the bottom, there is a pink banner with a 'Lesson' icon, a 'Previous Page' button, and a 'Next Page' button.

Activity #5: Performance Song Development 'Boom Boom Beat'

This song uses four groups: Purple, Yellow, Dark Green and Red, and it works best if you set them up in groups: purples all together on the left, then all the yellows together, all the greens and finally the reds.

You will hear that the music builds up, starting just with the purple, and each group joins in. You can start off with the reds just doing two hits, just like the others do, then doing their three note rhythm once they are established.

Slide for Activity #5: Performance Song Development 'Boom Boom Beat'. The slide features a navigation bar at the top with 'Warm Ups' (orange), 'Tunes' (green), 'Games' (purple), and 'Compositions' (pink). Below the bar, the title 'Boom Boom Beat' is centered. Underneath, it says 'Build up, then accelerate:' followed by four groups of musical notes: Purple (two notes), Yellow (two notes), Green (two notes), and Red (two notes). Below each group is a label: 'Pur - ple', 'Yel - low', 'Green Green', and 'Red Red Red!'. At the bottom, there is a pink banner with a 'Lesson' icon, a 'Previous Page' button, and a 'Next Page' button.

Activity #6: Game - Echo Clapping #1

This is self explanatory. You can either have them clap in response, or play their boomwhackers

Slide for Activity #6: Game - Echo Clapping #1. The slide features a navigation bar at the top with 'Warm Ups' (orange), 'Tunes' (green), 'Games' (purple), and 'Compositions' (pink). Below the bar, the title 'Echo Clapping #1' is centered. At the bottom, there is a pink banner with a 'Lesson' icon, a 'Previous Page' button, and a 'Next Page' button.

Activity #7: Composition - Pitch Circles

With this activity, you just group them into five groups - Red, Orange, Yellow, Dark Green and Purple, just like they were in for 'Whacky Beatz'.

Then, have one child come to the front, and decide the order of the groups, by dragging the circles down to the box.

You can then have them stay at the front and 'conduct' by deciding how quickly to move through the piece. Alternatively, you can make it either two or four bars per group and do it with no conductor.

Lesson Two

Activity #1: Introduction and Discussion - How to Play Boomwhackers

A revision of what was talked about in the last class.

It is never a bad idea to remind about the class of expected behaviour - it prevents problems with behaviour management later on.

This page is titled 'How to Play Boomwhackers' under the heading 'Introductory Discussion'. It features a navigation bar at the top with 'Warm Ups', 'Tunes', 'Games', and 'Compositions'. Below the title, there are two empty boxes for notes, labeled 'How SHOULD we play boomwhackers?' and 'What should we NOT do with boomwhackers?'. The page has a pink footer with 'Previous Page' and 'Next Page' buttons.

Activity #2: Warmup Song: 'Whacky Beatz'

This song requires Red, Orange, Yellow, Dark Green and purple Boomwhackers. Therefore set them up in five groups if possible.

A revision of the first song learned last lesson.

This page is titled 'Wacky Beatz' under the heading 'Introductory Discussion'. It features a navigation bar at the top with 'Warm Ups', 'Tunes', 'Games', and 'Compositions'. Below the title, there is a cartoon smiley face and a bar chart. The page has a pink footer with 'Previous Page' and 'Next Page' buttons.

Activity #3: Music Theory Skills - Long and Short Notes

This is your opportunity to work out who in your class knows a little bit of music. There will nearly always be one or two children in most classes who learn a musical instrument, and this gives them an opportunity to share their knowledge with the class.

If you wish you can always skip this activity.

Again, there is no terminology used deliberately, so that you can choose your own preferred language style. You can choose to call these whole notes & half notes, semibreves and minims or any of the mnemonic language methods from Orff and Kodaly methodologies.

This page is titled 'Long and Short Notes' under the heading 'Music Theory Skills'. It features a navigation bar at the top with 'Warm Ups', 'Tunes', 'Games', and 'Compositions'. Below the title, there is a diagram showing musical notes (half note, quarter note, eighth note, sixteenth note) and a line for ordering them from shortest to longest. The page has a pink footer with 'Previous Page' and 'Next Page' buttons.

Activity #4: Learning the Rumble

The previous activity talking about long and short sounds leads us nicely into this discussion. We can say 'how do Boomwhackers make a long sound?' and have the children try and work it out.

A percussionist would describe this as a 'roll' - and you can talk about that once they have some suggestions.

The best way to achieve it is sitting on the floor, with one hand a few inches above the ground. Then hit up and down in a rapid motion

Activity #5: Warmup Song: 'Boom Boom Rumble'

This song uses red, orange, yellow and dark green, and the rhythm is exactly like the title 'Boom - Boom - "Rumble"' (hold for six beats)

Warm Ups

Activity #7: Composition: 'Hit and Rumble'

The idea here is that the students can order the faces to make a class composition.

In this one they either do 'Hits' for the normal face design, or a 'rumble' for the funny face with the curvy mouth.

The screenshot shows a digital interface for 'Composition #2: Hit or Rumble'. At the top, there is a navigation bar with four colored tabs: 'Warm Ups' (orange), 'Tunes' (green), 'Games' (purple), and 'Compositions' (pink). Below the tabs, the title 'Composition #2: Hit or Rumble' is displayed. Underneath the title, there are two rows of five cartoon faces each. The top row of faces has neutral expressions, while the bottom row of faces has funny, curved mouths. Below the faces is a large empty rectangular box for composition. At the bottom of the interface, there is a pink banner with a 'Lesson' icon on the left and 'Previous Page' and 'Next Page' navigation buttons on the right.

Activity #8: Performance Song: 'Boom Boom Beat'

In 'Boom Boom Beat' the tune builds up - so it starts with just the purple group, then the yellow is added, the green and then finally the red. Once it is going, it starts to speed up, so make sure students are listening carefully!

The screenshot shows a digital interface for 'Boom Boom Beat'. At the top, there is a navigation bar with four colored tabs: 'Warm Ups' (orange), 'Tunes' (green), 'Games' (purple), and 'Compositions' (pink). Below the tabs, the title 'Boom Boom Beat' is displayed. Underneath the title, the instruction 'Build up, then accelerate:' is shown. Below this instruction, there are four groups of musical notes: two purple notes, two yellow notes, two green notes, and two red notes. Below the notes, the text 'Pur - ple', 'Yel - low', 'Green Green', and 'Red Red Red!' is displayed. At the bottom of the interface, there is a pink banner with a 'Lesson' icon on the left and 'Previous Page' and 'Next Page' navigation buttons on the right.

Activity #9: Revision/Spare

You can choose any of the songs or activities from the top menu that the children are familiar with.

Lesson Three

Activity #1: Introduction and Discussion: Notes and Rests

You can have children come to the board and drag each symbol to either the 'note' or 'rest' box.

The purpose of this activity is not necessarily to have them retain this information, but to get the concept of rests and their function in music.

Again, you can use whatever naming system your class is familiar with for these symbols.

Warm Ups Tunes Games Compositions

Lesson

Introductory Discussion

Notes and Rests

Drag the notes and rests to the right box:

Notes Rests
