

Uniondale Schools VISION STATEMENT

The increasing level of diversity in American society makes it necessary for individuals to broaden their understanding and acceptance of similarities and differences. Contributing members of society will be expected to use a myriad of technological, social, economic, political, and academic skills to problem solve, make decisions, and cope. Schools have a major role in helping to build and refine the skills individuals need to function in the complex and multi-faceted society of the future.

Uniondale Schools MISSION STATEMENT

All children are unique and will be helped to realize their full academic and social potential in a secure and stimulating environment.

The Uniondale School District, its Board of Education, staff, students, parents, and community members, as stakeholders in the shared decision-making process, believe that everyone will:

- Have the right to work and learn in a safe and secure environment.
- Be given the opportunity to develop character and enhance self-esteem.
- Develop and practice respect for themselves, their peers, the staff, the educational setting, and the community.
- Develop and practice respect for cultural diversity and character.
- Be given the opportunity for intellectual and academic challenges in a stimulating environment in which high expectations and a passion for learning are priorities.
- Be provided with an education that will prepare them to become problem-solvers, users of technology, literate, and productive citizens in a mosaic society.
